CREATING A BETTER FUTURE TOGETHER!

ALFASSA

www.alfassa.net – info@alfassa.net

HOW WILL OUR FUTURE BE?

Unfortunately we cannot deny the evidence, the current model of development is no longer sustainable, productivity is slowing all over the world, unemployment shows no sign of abating, and capitalism is now the master of the world, separated from all ethics and pure will animal of power and enrichment, it has become a threat to the basic goods and rights of the human being, such as the environment, health, dignity, integrity and life.

REVERSE THE MACROECONOMIC PARADIGM!

If we continue to operate with the current model of development, most likely, our society will collapse and with it, our existence and that of our future generations.

The most responsible people are responsible for mobilizing themselves to build a new global, peaceful and cooperative society based on a new model of production, consumption and coexistence that is completely eco-sustainable, a society where man's combative instinct is used exclusively to eliminate the cause of his own suffering and his many miseries, to overcome his weaknesses, ignorance and to triumph over his own limits.

What is ALFASSA?

ALFASSA is an Intellectual Capital which has the function of capitalizing and / or enhancing the intangible assets of its production ecosystem.

HUMAN CAPITAL

Human and the environment at the center

Disseminate and implement a new development model based on environmental and social sustainability criteria that considers the "economic" variable not as a value but as a means of creating value for man and the environment.

RELATIONAL CAPITAL

Generate value through networks of relationships and knowledge!

A set of reliable and high standing interlocutors who actively and proactively participate in the development of future-oriented programs capable of reversing the macroeconomic paradigm.

ORGANIZATIONAL CAPITAL

Interoperable and decentralized development system

A completely interoperable (Share) and decentralized (Multiply) Development System based on a socio-environmental model that applies to its development processes as a validation matrix.

Welcome in ALFASSA

1

RELATIONSHIP Join us!

Registration of production and knowledge specialties within the Development System to seize concrete business opportunities
